

ARGOS - Strengths & Points To Know

Public buyer file - commercial reading, technical clarity and known planning points.

English buyer version. This public document is an English summary/adaptation for international buyers. The French source documents and signed sale documents remain authoritative.

Main Strengths

- Rare 15.10 m Vulcain Bleu steel liveaboard boat with strong interior volume.
- Approx. 20 m2 panoramic upper deck, a major living and viewing space.
- Documented history, maintenance and investments from 2019 to 2026.
- Strong autonomy: solar, lithium, energy management, heating solutions and onboard equipment.
- Distinctive cultural story linked to the Mind Your Sperm European project.

Points To Know Before A Visit

ARGOS is not presented as a new boat. It is a documented, improved and habitable vessel with a clear technical calendar.

- Engine oil service is presented as an annual maintenance item to be planned every year.
- The main hull and exterior work package is grouped around 2029: hull survey, ultrasound thickness plan, haul-out, careening, antifouling, anodes, paint touch-ups, stern gland and underwater equipment checks.
- Administrative sale documents are kept off the public website and can be shared later with serious buyers.

Price Logic

The public presentation price is 124,000 EUR. A comparable Vulcain Bleu has been seen on the market around 145,000 EUR, giving a positioning gap of about 21,000 EUR. This gap broadly covers the projected 2029 major maintenance envelope, estimated around 15,000 to 20,000 EUR maximum.

This does not guarantee that ARGOS would automatically be worth 145,000 EUR after the works. It explains the chosen positioning: the known technical calendar is already reflected in the price.
